MOTOROLA
SOLUTIONS

On any given day, every moment matters to someone, somewhere. And every moment, Motorola Solutions' innovations, products, and services play essential roles in people's lives.

We keep utility workers connected and visible to each other with real-time voice and data communication across the smart grid. And we provide the situational awareness first responders need when a moment brings catastrophe.

We do this by connecting them to seamless communication networks, applications and services, by providing them with real-time information, and by arming them with intuitive, nearly indestructible radios and devices.

Wireless Broadband Solutions

Broadband Solutions

Cambium Networks Point-to-Point (PTP) Links

- Market leader in unlicensed Cognitive Radio Technology
- Spectrally agile using Dynamic Spectrum Optimization™
- Used for the most challenging links globally!

Cambium Networks Point-to-Multipoint (PMP) Access Networks

- Market leader in unlicensed & licensed PMP
- Ideal for enterprise access
- Voice, video and data capable

ePMP™ BY CAMBIUM NETWORKS

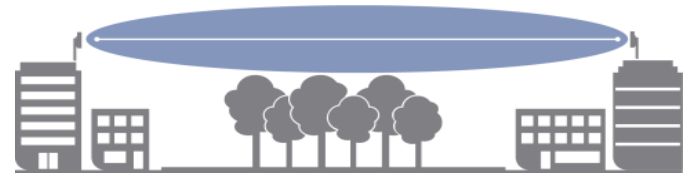

- The new Standard in Wireless Broadband
- Affordable Scalability and Reliability

Site Surveying

- A number of surveying teams are always ready for customer requirements
- All teams are well trained and prepared with all necessary equipment

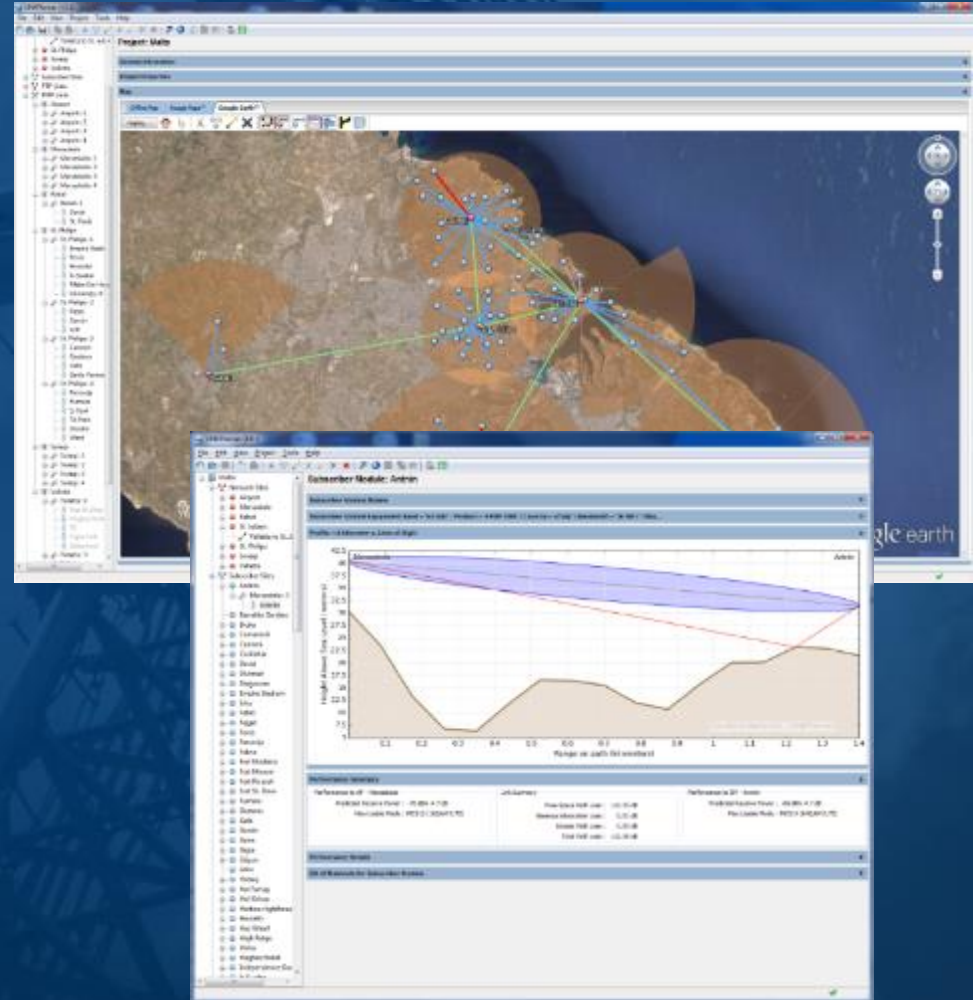

- All teams are familiar with different site conditions
- Accurate site surveying helps getting more accurate system design and achieving customer requirements

Wireless Broadband Services

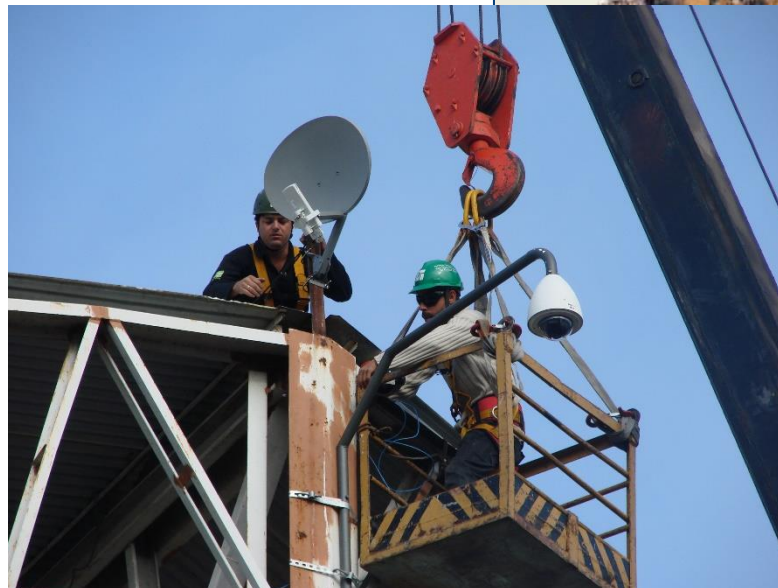

System Design and Planning

- Planning using Cambium Networks Link Planner software
- PTP performance and availability planning
- PMP distribution, link budget and capacity planning
- Accurate path profile information
- Integration with Google Earth and Google Maps.
- Generates professional reports like Bill of Quantity, installation reports and proposal reports.

Installation and Commissioning

- Skillful and experienced installation teams
- Familiar with the most critical and difficult installation conditions
- Familiar with the all kind of sites like offshore sites and petroleum sites
- Professional installation reports

After Sales Support and Services

- Extended warranty options
- SLA options
- Maintenance contracts
- Certified Maintenance Center
- Fast Response in critical situations

Business Partners

is a leading global information and communications technology (ICT) solutions provider

Is a leading networking company and one of the leading providers of software driven networking solutions. Extreme deliver an IT infrastructure that's fast, and resilient— from wired to wireless, desktop to datacenter.

CCTV Solutions

Axis is the market leader in network video. We invented the world's first network camera back in 1996 and we've been innovators in video surveillance ever since, increasing the security of millions of people worldwide and helping to meet the growing need for a smarter, safer world.

Others make cameras. We make people safe.

The Purpose of a security system is to make you safe and feel safe. Period. That includes your person, your business, your property, your budget.

It's not about pixels or data rates or cameras and software. It's about how all those things, working together, add up to your safety net.

Here's how we do it.

We don't just supply cameras and encoders and monitors. We build you a safety net.

We design your system end-to-end, with no single point of failure, so it's reliable. We design it with Distributed Network Architecture so it's flexible. You can add any number of cameras and work stations effortlessly. We make it smart, so your old analog cameras will migrate to IP and work with our HD cameras.

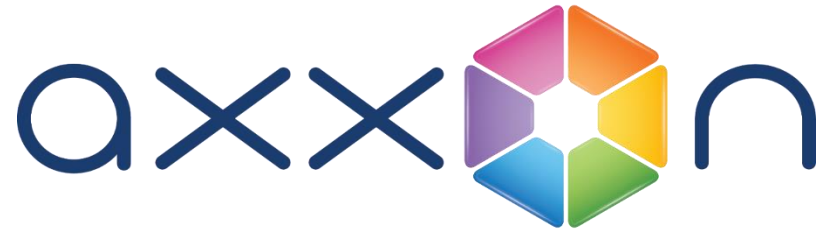

HIKVISION

Hikvision is the world's leading supplier of video surveillance products and solutions. Featuring the industry's strongest R&D workforce, Hikvision uses its state-of-the-art manufacturing facilities to design and develop innovative CCTV and video surveillance products. The company's complete product suite includes Smart IP cameras, HD analog cameras, speed domes, NVRs, DVRs, video management software, access control and alarm systems, encoders, decoders, and other elements of sophisticated security systems.

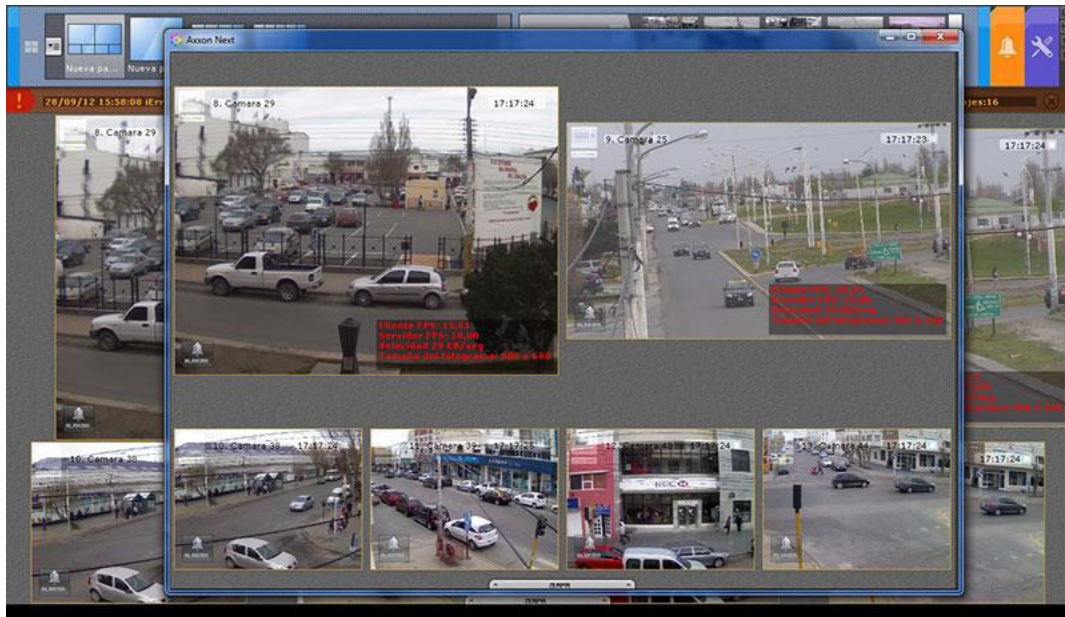

HIKVISION
First Choice for Security Professionals

Axxon is a major software developer that combines end-to-end, IP-based physical security management, intelligent video surveillance, and an enterprise-wide platform. We offer integrated, out-of-the-box vertical and horizontal solutions for governments, institutions and commercial enterprises.

As global leaders in the area of converging technologies, Axxon has created software that is so highly developed, it allows users to do more than they've ever done before - easily, quickly, and in accordance with their existing systems and strategies.

CCTV Solutions

QNAP

QNAP Systems, Inc., as its brand promise "Quality Network Appliance Provider", aims to deliver comprehensive offerings of cutting edge network attached storage (NAS) and network video recorder (NVR) solutions featured with ease-of-use, robust operation, large storage capacity, and trustworthy reliability.
